How Our Security Approach Protects You

Security is a top concern. For your protection, only people who need your information to do their jobs have access to the personal information you provide us. Below are details about how our layered security strategy helps keep our customers safe.

- **Anti-Virus and Anti-Malware Protection** - To detect and prevent viruses and malicious software.
- **Firewalls** - Network security utility to block unauthorized access.
- **Secure Socket Layer (SSL) Encryption** - Encryption to protect your information from being intercepted by creating a secure connection with your browser when you log in, register, or enroll in an online course.
- **Login Details** - We do not share your usernames and passwords.
- **Automatic Logout** - We automatically log you out of your secure session after a period of inactivity to help protect you against others seeing or using your online accounts.
- **Account Monitoring** - Our company monitors online account activity for potential fraud.

Take Action to Protect Yourself

How you can protect yourself

- Ensure that your Warrior Trading username and password differs from those you use for other online accounts.
- Always log-out of your account and close your browser; when not using our services.
- Passwords should not contain common words, your user name, or the word 'Password'.
- Malicious software can be found on every type of mobile device; not just laptops or desktops. Make sure you download only trusted applications and have antivirus protection enabled on all devices.
- Use caution when using mobile hotspots and unsecured networks (coffee shops, hotels, airports).
- Be suspicious of e-mail attachments from unknown sources.
